

Current Protocols in Cell Biology

Supplement 38

New Topics

March 2008

In this Supplement

UNIT 3.28 Isolation of Amyloplasts

UNIT 6.10 Two-Dimensional Blue Native Polyacrylamide Gel Electrophoresis

UNIT 14.8 Rho GTPase Activation Assays

UNIT 21.6 Photoactivation and Imaging of Photoactivatable Fluorescent Proteins

Coming Soon

Quantitative Colocalization Analysis of Confocal Fluorescence Microscopy Images

Visualizing Protease Activity in Living Cells: From Two Dimensions to Four Dimensions

Assays for Ribosomal RNA Processing and Ribosome Assembly

Visualization and Measurement of Methyltransferase Activity in Living Cells

Making Giant Unilamellar Vesicles via Hydration of Lipid Films
